

MMS School Counseling Program 2015-2016

Strategic Plans aligned with the Student Success Plan

College and Career Readiness

MMS counselors strive to meet the goal that all students have the educational preparation and social skills necessary for success in the high school of their choice, the college of their choice, and ultimately in a career which they find fulfilling. We recognize that this goal is ambitious. There are numerous barriers in students' paths that we, as counselors, attempt to remove or lessen so that our students reach their potential. Economic inequities pose challenges to our students and their families. We are working towards understanding and confronting these inequities. Resources like Education Pays provide the economic benefits of planning and pursuing education beyond high school.
